ADVENTURE TRAILS

MAIN BROCHURE

GENERAL INFO

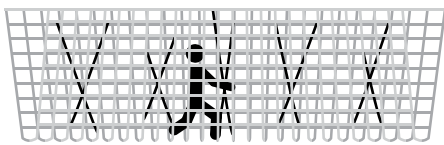

Adventure trail is an elevated playground that allows children from the early age of 3 to play and overcome challenges in a safe, controlled environment. The trails combine colorful houses, tunnels and obstacles to create a memorable and fun experience. Their structure is highly flexible, which makes them a great fit for any entertainment center or playground.

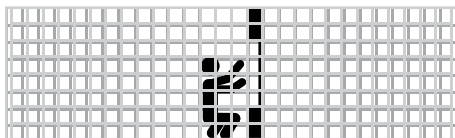

TUNNELS

The Adventure trail tunnels are offered in 3 different shapes - triangular, rectangular and circular. They are all made of the same type of nets, with the sole difference being their visual style.

Triangular

Rectangular

Circular

OBSTACLES

There are 4 obstacle models that can be placed inside the Adventure trail tunnels to challenge visitors and enhance their experience. They are easy to replace and rearrange.

HOUSES STYLES

There is a vast variety of Adventure trail houses to choose from. They all share a similar structure to create a feeling of unison, but their different styles immerse children in exciting plotlines when they play. In one house they can play-pretend to be police investigators, and in another - astronauts on their way to space.

FREE STANDING & EASILY PAIRED

The Adventure Trail is an amazing attraction by itself - it entertains children for hours and hours. But it can also be paired with other entertainment attractions. It makes a great combination with slides, ropes courses and Walltopia's Cloud Climb attraction. And of course, we are always open to exploring new possibilities to integrate it with an attraction of a clients' choice.
